DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to an absorbent tampon, classified in class 604, subclass 385.17.
- II. Claims 10-13, drawn to a method of increasing the absorbency of lyocell fibers, classified in class 8, subclass 116.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention I is drawn to a tampon which is mutually exclusive from invention II which is drawn to a method of increasing the absorbency of lyocell fibers; invention II does not claim a method that is related to making a tampon nor does it claim a method that is related to using a tampon.

A telephone call was made to Mr. Rothfus on 24 February 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
